Product notes

Menu: Sales ? Product templates/Subproduct ? Product note template

Note templates in different languages can be attached to a product. The note templates are displayed in the document as soon as the product is added.

Create and edit

Choose between internal and external note templates

Internal note templates are displayed in a document under Internal notes and cannot be included in an Itinerary.

External note templates are displayed in a document under Product notes and can be displayed in an Itinerary.

> Note that the language of the notes must match the language of the document for the notes to be displayed. (The document language can be defined when creating or edited under Properties).
