Text templates

Menu: Export ? Text templates

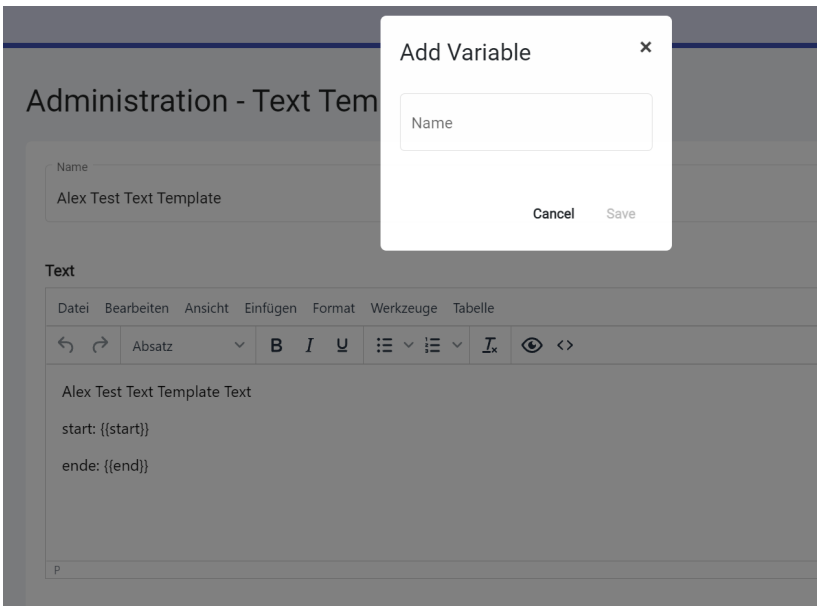

What

Text templates are individually created texts that can then be manually copied into a document as desired. This means that they do not always have to be rewritten.

Create and edit

How to create text templates and where to use them?

Create a text template and add the text you want to reuse. Variables can also be added. You will have to enter the value vor the variables when adding the template to a text editor.

The text templates can be used in any editor in the advatra system:
